

**Vapor Tech is a manufacturer of vapor scrubber systems for the removal of many hazardous and odorous chemical products. In addition, our scrubber line spans from micro units for laboratories to large scrubbers for chemical refineries and tank terminals.**

**Start with Proper Research & Design**

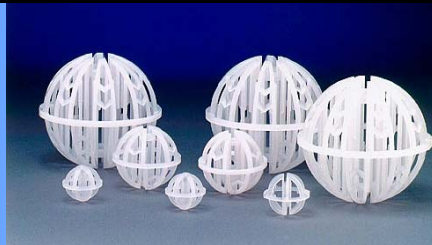

Simplicity is the key to low maintenance and low operating costs. Packed Column Technology (PCT) is simple, yet possible of yielding extremely high efficiencies on many products.

Why spend more money on a complicated system which yields in most cases the same efficiencies as a traditional packed column design?

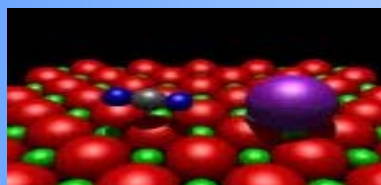

We believe that through a close coupling of proven chemical agents and Packed Column Technology, we can simplify your system while saving you considerable capital investment and long term operating costs.

*Contact us regarding your specific application today!*

**Quality Materials for Maximum Results**

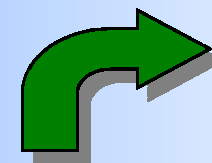

Vapor Tech uses the most current technology possible to ensure maximum results. In addition, we are always searching for new technology which may increase efficiencies while reducing risks and costs.

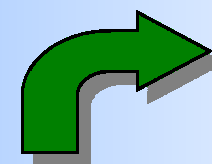

**Proven Results for the Following Products:**

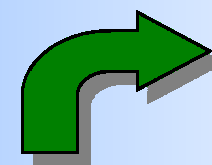

BTEX Compounds / Gasoline / Mercaptan / ECH / Acids / Bases / Oils / Acrylates / Amines Ammonia / Chlorine / Sulfide / H2S / Sewage odors / Grease & Waste Oils / Fats / & More..

**Micro Vapor Scrubbers for labs and other small vapor streams**

**Larger Scrubbers for plants and tank terminals**

**Wide range of construction materials including plastic**

## Rental Scrubbers

We rent vapor scrubbers for tank cleaning applications. Contact Vapor Tech for details and availability.

4500 c.f.m. Units

Odor Control & Hydrocarbon Scrubbing

Comes with Carbon Polisher Unit (optional)

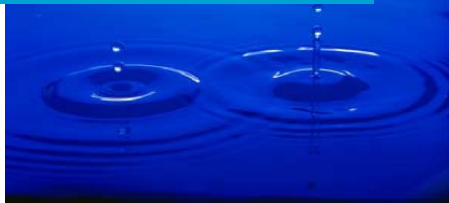

## Carbon Filtration

We rent and sell vapor phase carbon units.

200# Drum Adsorbers  
500# Vessels  
2000# Vessels  
Custom Units

## Scrubber Chemical Agents

Vapor Tech has proven chemical agents which may be used in our scrubbers systems for:

**Benzene/Toluene/EDC/Mercaptan/Acrylate/ECH/Gasoline/Oils/Sulfide/Acids/Bases/Sewage/Chlorine/ And many others...**

These chemical agents coupled with our scrubber systems are capable of reducing time, odors, flammability, and health risk to your employees and the surrounding community.
